A THOUSAND HORSES

Grady Yates

"A savior of the lost art of Americana storytelling"

- Mario Tarradell - Dallas Morning News

Grady grew up along the banks of the Mississippi, in Saint Louis Missouri. For some reason, he and his childhood friends always had a big stack of Texas artists records alongside their other musical influences. This was probably due to the early days of Austin City Limits; a nationwide PBS staple that was about the only live music on TV back then. Hearing the songs of Willie Nelson, Jerry Jeff Walker, Rusty Wier and other Texas based singer-songwriters, Grady knew where his musical muse would lead him some day. He made the move from Missouri to Texas in 1980.

His songwriting is a blend of those Texas legends; along with Guy Clark, James Taylor, and a dose of Nanci Griffith. His stories are often personal, sometimes historical, a few a blend of legend and dreams.

Regarding the release of Grady's new CD, "A Thousand Horses", Jeff Hopson, contributor to Outlaw Magazine, had this to say about Grady Yates: "This is music for a good reason. It is music of a lasting nature, transcending fads and flavors-of-the-month and completely without pretension. Give it a listen."
